Each prompt below assumes the CSV is attached to the chat (or pasted in). All claim IDs and values come from the actual file.

#	Prompt type	Columns used	Prompt
1	**Zero-shot**	customer_message, intent_label	Using only the attached insurance_synthetic_dataset.csv, read the customer_message for claim CLM-2026-00014 and tell me what the customer wants. Return one intent from the intent_label values that exist in the file, plus a one-line reason.
2	**One-shot**	customer_message, sentiment_label, priority	Here is one example from the dataset: Message: "Your agent was rude and gave me wrong information about my home policy POL-HO-267414." Output: Sentiment = Negative, Priority = High. Following the same format, give the sentiment and priority for the customer_message of claim CLM-2026-00012. Use only values found in the CSV.
3	**Few-shot**	customer_message, intent_label, sentiment_label	Examples from the dataset: 1. "What is the maximum amount payable for theft under policy POL-AU-415568?" → coverage_inquiry, Neutral 2. "I'd like to renew policy POL-HE-140605. Are there any no-claim benefits I can use?" → policy_renewal, Positive 3. "Your agent was rude and gave me wrong information about my home policy POL-HO-267414." → complaint, Negative Now label the first 5 rows where claim_status is "Under Review" in the same format: claim_id → intent, sentiment.
4	**Conditional prompting**	claim_status, documents_complete, fraud_suspected, rejection_reason, adjuster_notes	For claim CLM-2026-00135 in the attached CSV, write a customer-facing update that follows these rules: If claim_status is Pending Documents, list the missing items from adjuster_notes. If it is Rejected, state the rejection_reason politely and mention the appeal option. If fraud_suspected is TRUE, do not mention the fraud flag to the customer. Otherwise, give the current status and next step. Keep it under 80 words.

#	Prompt type	Columns used	Prompt
5	**Chain of thought**	claim_amount_inr, deductible_inr, approved_amount_inr, sum_insured_inr	For claim CLM-2026-00004 in the CSV, reason step by step: 1) Read the claim amount, deductible, sum insured and approved amount. 2) Check whether the claim exceeds the sum insured. 3) Compute claim amount minus deductible. 4) Compare that with approved_amount_inr. 5) State the gap in rupees and what percentage of the payable amount was approved. Show each step, then give a final one-line conclusion.
6	**Train of thought**	prior_claims_count, fraud_suspected, claim_filed_date, incident_date	Explore the CSV freely and think aloud about whether fraud-suspected claims look different from others. Look at prior_claims_count, the gap between incident_date and claim_filed_date, and claim_amount_inr. Note each observation as it occurs to you, follow any interesting thread, and say when a hunch does not hold up. End with the 2 strongest patterns, supported by numbers from the file.
7	**Self-consistency**	claim_amount_inr, deductible_inr, approved_amount_inr, claim_status	For claim CLM-2026-00004 in the CSV, answer this question: "Was the customer paid the full amount payable after the deductible?" Work it out through 3 independent reasoning paths: (a) a direct amount comparison, (b) a percentage-of-claim approach, (c) a check against claim_status and adjuster_notes. Give each path's answer, then state the majority conclusion and your confidence level.
8	**Option-based**	claim_status, fraud_suspected, prior_claims_count, adjuster_notes, documents_complete	Review claim CLM-2026-00135 and pick the single best next action: A) Approve and pay B) Reject with explanation C) Send to the fraud investigation team D) Request additional documents Reply with the option letter, followed by 2 sentences justifying it using specific column values.

9	**Role prompting**	policy_type, claim_type, claim_amount_inr, sum_insured_inr, adjuster_notes	You are a senior claims adjuster at an insurance company with 15 years of experience. Review claim CLM-2026-00004. Summarize the case in 4 bullet points covering the claim type, amounts, verification status and any risk indicators. Use professional adjuster language and base every point on the data. If the prompt is not related to the attached data, respond "Invalid Question"
			You are a senior claims adjuster at an insurance company with 15 years of experience. Review claim CLM-2026-00004 and check how much money was used to buy the latest car. Use professional adjuster language and base every point on the data. If the prompt is not related to the attached data, respond "Invalid Question"
10	**Lead-in prompt**	policy_type, claim_type, claim_status, approved_amount_inr	Complete the following paragraph for claim CLM-2026-00004: "This claim was raised under a ... policy for ... . The customer claimed Rs ..., and the final outcome was ... with an approved amount of Rs ... . The key factor affecting the payout was ..." Fill each blank from the data and finish the last sentence in your own words.
11	**RTF (Role Task Format)**	claim_id, customer_name, policy_type, claim_type, claim_amount_inr, approved_amount_inr, claim_status, settlement_date	**Role:** Claims communication officer. **Task:** Generate a claim summary for claim CLM-2026-00004 **Format:** Use exactly this template: Claim ID: Customer: Policy Type: Claim Type: Amount Claimed (Rs): Amount Approved (Rs): Status: Settlement Date: One-line remark: If any of these values is a blank, put a "-" in the final output

#	Prompt type	Columns used	Prompt
12	**Classification prompt**	customer_message, intent_label, sentiment_label, priority	Classify the customer_message of claim CLM-2025-00005 along three dimensions: Intent: choose from the unique values in intent_label Sentiment: Positive / Neutral / Negative Priority: High / Medium / Low Return JSON with keys intent, sentiment, priority and reason. Then check your labels against the CSV values and say whether they match.
13	**Evaluation prompt**	customer_message, agent_response, response_quality_score	Evaluate the agent_response for claim CLM-2023-00021 against its customer_message. Score it from 1 to 5 on each of: relevance, accuracy, completeness and tone. Give a one-line justification per criterion and an overall score. Finally, compare your overall score with the response_quality_score in the CSV and explain any difference.
14	**Ask Before Answering**	customer_message, policy_type, claim_type, documents_complete, incident_date	A customer's message for claim CLM-2025-00005 reads: "I want to file a claim for a baggage loss incident under my travel policy POL-TR-609597. The estimated loss is around Rs 94,300. What do I need to submit?" Before giving any answer, list the clarifying questions you need answered, such as incident date, location or proof available. Check the CSV first, and ask only about details it does not contain. Once the missing details are clear, wait for my reply before drafting the response.
			Customer with policy number POL-TR-609597 has claimed for a baggage loss. Extract and analyse this customer's message. Before giving any answer, list the clarifying questions you need answered, such as incident date, location or proof available. Ask only about details it does not contain. Once the missing details are clear, wait for my reply before drafting the response.

#	Prompt type	Columns used	Prompt
15	**LLM-as-a-Judge**	customer_message, agent_response, response_quality_score	Act as an impartial judge. Using the CSV, compare the agent_response of CLM-2023-00021 (score 1) with that of CLM-2025-00001 (score 5). Rate both on correctness, helpfulness, policy compliance and empathy (1 to 5 each), with a short reason for each rating. Declare which response is better and why, and flag any statement that over-promises or misleads the customer. Do not let response length influence your verdict.
